EMPLOYMENT HISTORY

American Dream, East Rutherford, NJ   February 2022 – July 2023
Retail Ambassador
- Utilized Shopify POS systems to processes orders with over $50,000 in individual sales.
- Collaborated with internal teams, including managers and stock replenishers to create a welcoming experience to guests.
- Processed sales with 100% accuracy at speeds that exceeded my co-workers.
- Maintained an organized station and employed suggestive selling techniques to increase sales and return rates.

American Dream, East Rutherford, NJ   July 2023 – Present
Concession Operations Associate
- Selected out of current retail ambassadors (3 out of 50) to transfer to new company.
- Fast paced environment with average of $3000 daily sales.
- Managed food and beverages maintaining food safety protocols and customer satisfaction in a station independently.
- Utilized Clover POS systems to process orders and contribute to seamless concession operations.
- Trained co-workers who primarily spoke Spanish in a fluent and understanding way that matched my performance.

PROJECTS

Productivity Website | **GitHub** | *JavaScript, HTML, CSS*
- Developed a dynamic and interactive to do list website that follows modern user interface designs including shape opacity, round borders, auditory feedback, and color theory.
- Implemented DOM manipulations such as querySelectors and tree data structures to organize task blocks and categories, enabling user interaction and modification of CSS attributes.
- Ensured that the application is mobile-friendly by implementing CSS responsive layout though media queries.

BetterPapercut | **GitHub** | *Figma, Bootstrap, JavaScript, HTML, CSS,*
- Revised a current printing UI "Papercut" for Brooklyn College to better cater to student's needs involving student interviewing processes and prototyping.
- Cooperated in a team of 5 and went through a practical process of need finding, interviewing, personas, storyboards, prototypes, and development phases.
- Utilized Bootstrap to incorporate responsive UI and intuitive experience to improve user engagement.

Gear Gates | **GitHub** | *Java Processing*
- Created an interactive 2D game using Processing involving collision detection animation graphics and user interaction.
- Designed levels and picking up mechanics through logic and square logic sprites throughout the playing map.

EDUCATION
